YOUR BUSINESS APPRECIATED

W. T. Cooper & Co.

Liked It Better Before.

Edna wanted to go to the play with her mother, but was told she would not enjoy it. However, after much coaxing, she was allowed to go. When she returned her father asked her how she liked it. "Well, daddy," she replied, "I liked it a whole lot better before I went than I do now."

Chewing Gum.

Much of the best chewing gum is said to be made from the gums of the chicle tree, found in Mexico. It was first introduced into the United States in 1870, and soon largely replaced other gum materials then in common use.

BEAUTY PARLOR WAS CLOSED

Artist Announces Suspension of Business After Painting New Faces on All Dolls in Neighborhood.

Will Vawter, the artist and book illustrator, lives in the edge of Nashville, the seat of Brown county. Some days ago while, as he expressed it, "spoiling some good, clean canvas," a five-year-old girl appeared in the doorway, says the Indianapolis News. In her arms was a doll almost as long as herself, from which the features and complexion had quite disappeared. These she asked the artist to restore. "You can do it," she said, "I know you can an' she's such a sweet dolly, too, an' both of us would thank you ever so much."

Mr. Vawter painted in a new face with the rosiest cheeks and a beautiful pair of unwinking blue eyes. The little maid with the repaired dolly and all bubbling over with gratitude went away.

In a few minutes another small girl appeared. She wished her dolly's face repaired and the artist complied with the request.

Within half an hour a dozen more small girls of Nashville were at his studio with dolls needing new faces. Mr. Vawter shut the door and gave up the day to making faces for all kinds of dolls, from the old-fashioned rag baby to the most pretentious efforts in wax.

"Now," he said when he had finished, "don't you girls send any more repair work of this kind to me. This beauty parlor has closed."

CORN A GREAT CIVILIZER

Introduction of American Product Into Africa First Lifted Natives Above State of Savagery.

The Arabs were at the same time the civilizers and the curse of Africa. They harried the continent from the Mediterranean coast to the borders of Cape Colony. But their slave caravans carried a great blessing to the interior of Africa. They gave it corn.

The great American product seems to have found its way first to Egypt. All over the western Mohammedan world the golden grain is known as "Missir"—and Missir or Mussur is the Arabic designation of Egypt. From Egypt corn seed was carried south into the heart of Africa and beyond it by the Arab slave raiders. Henry M. Stanley tells of fields of corn, or "mealies," on the Nyansa.

Corn lent itself well to the climate of central and southern Africa. Its cultivation was the beginning of civilization among the blacks of the dark continent. The mealie patch raised the tribesmen one degree above the state of savagery. It supplemented the occupation of hunting with that of farming. It promoted steady habits, settled life, provident customs.

FOSSIL IVORY FOUND.

Fossil ivory in the shape of gigantic tusks of mammoths is still found under the ice of Siberia, and a remarkable art product lately received by the American Museum of Natural History is a jewel box made from this material by Siberian natives. The corners are carefully dovetailed. The sides and top are elaborately carved, and in the lattice work patterns of the sides are worked human and animal figures suggestive of life in the land of ice and snow.

LIKE THE DRUNKARD.

"That fellow has a three days' growth of beard on his chin."
"Yes, he's one of those men who can shave or leave it alone."

NEW SIGN.

"Your daughter has grown to be quite a young lady."
"Yes; she has just put on her first short skirt."

FATHER OF HIS COUNTRY.

Washington was hailed as the father of his country.
"And I raised it to be a soldier," he cried.

TRUE AFFECTION.

Indignant Pedestrian—To hades with your car, and you, too!"
Motorist—That's right, old top; don't separate us."

THE TEST.

Poet—How is my last book of verse selling?
Publisher—Great! Paper mills are fighting for it at \$5 the ton.

AT THE CHURCHES.

Strangers in the city and the public are cordially invited to all services at the following churches:

Cumberland Presbyterian Church—J. B. Eshman, Pastor. Sunday School at 9:30. Preaching at 11 a. m. Christian Endeavor 6:30. Preaching at 7:30 p. m.

First Presbyterian Church—Sunday School—9:30 a. m. Morning Service 11:00 a. m. Evening Service 7:30. Christian Endeavor—7:00 p. m. Weekly Prayer Meeting Wednesday—7:30 p. m.

First Baptist Church—Rev. C. M. Thompson, Pastor. Services as usual.

Sunday School—9:30 a. m. Morning Service—11:00 a. m. Evening Service—7:30 p. m.

Second Baptist Church—Rev. W. R. Goodman, Pastor. Sunday School—9:30 a. m. Preaching—11 a. m. B. Y. P. U. 6:30 P. M. Prayer meeting every Wednesday night—7:30 p. m.

Westminster Presbyterian Church Sunday School—9:30 a. m. Men's Bible Class—10:00 a. m. Morning Service—11:45 a. m. Evening Services 7:30 p. m.

Grace Church—Rev. Geo. C. Abbott, Rector. Morning prayer and sermon at 6:45.

Sunday School at 9:30 a. m.

Leopards in Palestine.

In ancient times the hilly ranges of Lebanon, in Palestine, were frequented by leopards. Even now they sometimes appear in and about Lebanon; also the cheetah, which is tamed by the Mohammedans of Syria, who employ it in hunting the gazelle.

Hardly Necessary.

Harold, four, came down late for breakfast and found a very simple meal at his place. He took his seat, thought for a moment, then turning to his mother, said: "Mamma, I guess I won't thank God for this little bit of food."

An Electric Pistol.

An inventor has turned out an electric pistol built along original lines. It does not use gunpowder or cartridges, but is so constructed that its contents, gases, are exploded by a touch of the button and a projectile is expelled. The pistol consists of a brass cylinder at one end of which is a small battery and coil. The gases are introduced from the outside or from a small tank attached to the pistol frame, explains the Electrical Experimenter. Although the use of electricity in this case is merely an experiment, it is evident that it can be used to produce exactly what powder does, explosion in a confined space and the swift movement of a missile. Mankind began with a club and a stone to deliver blows. The bullet is only a small but speedier object than a hand-thrown stone, wounding at a greater distance than is possible with a spear or arrow.

Notice, Contractors.

Sealed bids will be received by the fiscal court of Christian county until 12 o'clock noon, July 3rd, to build one and four-tenths of a mile of macadam road beginning at end of pike on Butler road and extending to Honey Grove.

A certified check for \$100.00 must accompany each bid. The right is reserved to reject any or all bids.

Plans and specifications can be seen at office of Road Engineer, Hopkinsville, Ky.

J. H. DILLMAN,
Road Engineer.

Scoliosis Only a Symptom.

Dr. Mark H. Rogers points out in the Journal of the American Medical Association that scoliosis is not a disease but a symptom and almost always of strain in the joints of the lower methods of treating it are useless, except in so far as they may relieve the pain.

Hair Was Seized.

A neighbor's child, three, had never before noticed that her uncle had a bald spot on his head. On the occasion of a recent call she said: "Oh, Uncle Frank, you have a hole in your hair."

Waste No Food

Food Waste of About 700 Million Dollars.

"For partial immediate relief, every individual and community should consider earnestly the matter of food conservation and the limitation of waste. As a Nation we seem to have a disdain of economizing. In many homes there is a strong feeling that it is 'only decent' to provide more than will be eaten and that it is demeaning to reckon closely. The experts of the Department of Agriculture report to me that the dietary studies made by them point to an annual food waste of about \$700,000,000. Of course, the waste in families of very limited means is slight, but in the families of moderate and ample means the waste is considerable. Even if the estimate were reduced by half, the waste would still be enormous.

"The food waste in the household, the experts assert, results in large measure from bad preparation and bad cooking, from improper care and handling, and, in well-to-do families, from serving an undue number of courses and an over-abundant supply and failing to save and utilize the food not consumed. As an instance of improper handling, it is discovered that in the preparation of potatoes 20 per cent of the edible portion in many cases is discarded."—SECRETARY OF AGRICULTURE, March 3, 1917.

Food is Wasted

(a) When we eat more food than our bodies need for growth and repair and to supply energy for our work. Overeating tends to poor health and fat instead of brawn, makes us sluggish and indolent instead of energetic and resourceful. Eat enough and no more. Eat for physical and mental efficiency.

(b) When food is burned or spoiled in cooking. Improperly prepared or poorly seasoned food will be left on the table and probably wasted. Buy food wisely and then prepare it carefully.

(c) When too much food is prepared for a meal. Unserved portions are apt to be thrown into the garbage pail or allowed to spoil. Many housekeepers do not

know how to use left-over foods to make appetizing dishes.

(d) When too much food is served at a meal. Uneaten portions are left on the plate and later thrown into the garbage pail. Learn to know the needs of your family, and serve each no more than you think he will want.

(e) When anything edible is allowed to go to the garbage pail or allowed to spoil for lack of proper handling.

(f) When food is handled carelessly. Buy clean food, keep it clean until used, be neat in all details of cooking and serving. This lessens waste and is a valuable health measure as well.

Feed Your Own Family First

Don't feed high-priced human food to hogs or chickens.

Don't send valuable food to the incinerator or the fertilizer heap.

Don't pour into the sewer nourishing food in the shape of milk, skim milk, sweet or sour soup, gravy, or melted fat, or water in which cereals or vegetables have been cooked.

Keep good food out of your garbage pail and kitchen sink.
